

Road use charge, goods transport Czech Republic

Road use charge - motorways and assimilated roads

In the Czech Republic, the use of trunk roads and motorways by vehicles with at least four wheels or vehicles with trailers is subject to a user charge.

Electronic toll system - vehicles of over 3.5t

Since 1 January 2010, the electronic toll system has been extended to all vehicles of over 3.5t driving on motorways, assimilated roads and first-class roads. The toll is calculated according to the vehicle's Euro category and the number of axles. The time of the day and the day of the week are also taken into consideration.

Before using toll roads, a vehicle must be registered for the electronic toll system, a deposit must be paid and the "premid" vehicle device must be properly installed in the vehicle. Registration for the "premid" vehicle device depends on the payment method selected. A registration form must be completed. This is available at all "premid" distribution and contact centres and can also be downloaded from the following web site: www.premid.cz

Important: If no toll transaction has been recorded over the past 12 months, the on-board unit must be returned. Indeed, after this period, the device will automatically be switched off. Please find more information [here](#).

Rates for motorways and assimilated roads

The Government of the Czech Republic has decided to increase the toll rates and implement a new tariff category "Euro 6", which is effective since 1.1.2015. Euro 6 tariff is meant for the vehicles with the emission class EURO VI or EEV and it is the most advantageous existing rate.

Since 01.01.2015; tariffs in CZK/km

Emission class	EURO 0-II			EURO III-IV			EURO V			Tariff Euro 6 EURO VI, EEV		
	2	3	4+	2	3	4+	2	3	4+	2	3	4+
Highways and motorways	3,34	5,70	8,24	2,82	4,81	6,97	1,83	3,13	4,52	1,67	2,85	4,12
-- Friday 15-20 h	4,24	8,10	11,76	3,58	6,87	9,94	2,33	4,46	6,46	2,12	4,05	5,88
1st class roads	1,58	2,74	3,92	1,33	2,31	3,31	0,87	1,50	2,15	0,79	1,37	1,96
-- Friday 15-20 h	2,00	3,92	5,60	1,69	3,31	4,74	1,10	2,15	3,07	1,00	1,96	2,80

The claim to Euro 6 has to be proven by a document of the vehicle (vehicle registration certificate). The EU/EHS standards complying with the emission class Euro VI or EEV have to be clearly stated in the document.

All information is available on this [web site](#).
