

Train the trainers workshop – LCV July 2026

VDO Fleet App

VDO Fleet Solutions

03.11.2025

Product Overview – VDO Fleet App

Features for Drivers

Manual Entries

- / Create and send manual entries directly via the app to the DTCO (DTCO 4.1a and newer).

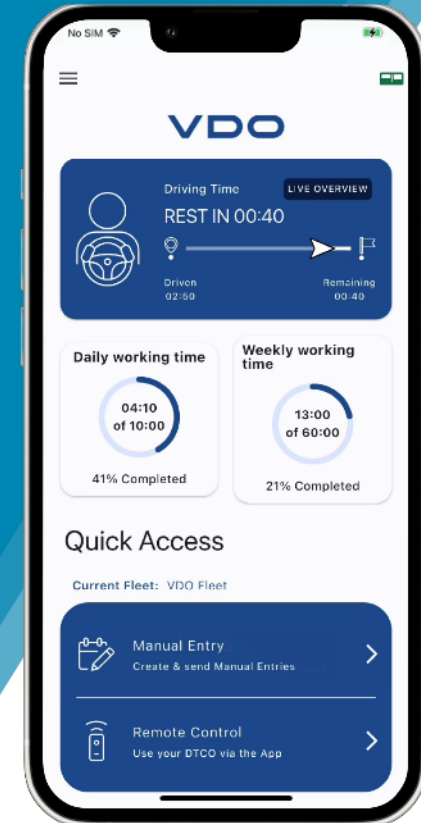

Remote Control

- / Easily manage your work activities via the app and transfer them directly to the DTCO.

VDO Counter

- / Driving, work, and rest times calculated and displayed in a detailed overview of daily and weekly activities.

All features only with DTCO 4.1a and newer

Connection and session activation

Enable Bluetooth connection

Auto-Connect for Bluetooth connection to driver card

Pre-Condition:

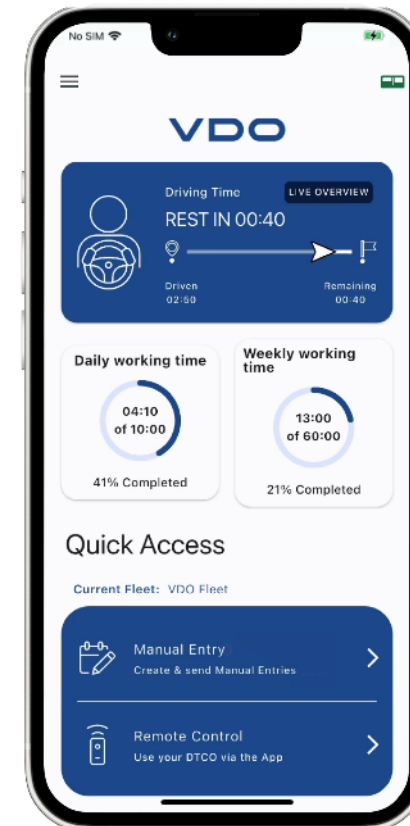

- / DTCO 4.1a and newer

Enabling Auto-Connect:

- / Enter into Bluetooth Menu for related driver card slot on DTCO
- / Enter into Auto Connect Menu in VDO Fleet App
- / Confirm token for first Bluetooth connection

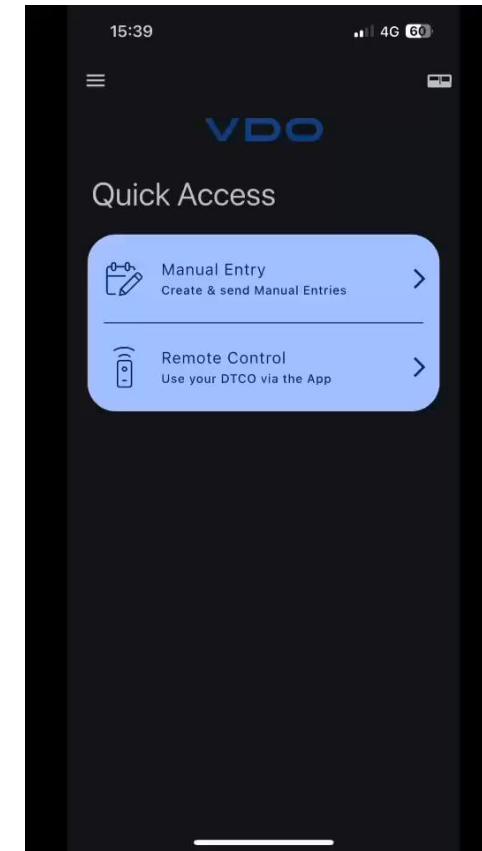

General Information:

- / For first bluetooth connection, token confirmation is required
- / After token confirmation, connection can be done without token by selecting the DTCO in auto connect list

Enable Bluetooth connection

Auto-Connect for Bluetooth connection to driver card

Remote Control

Sending DTCO commands via mobile app

Pre-Condition:

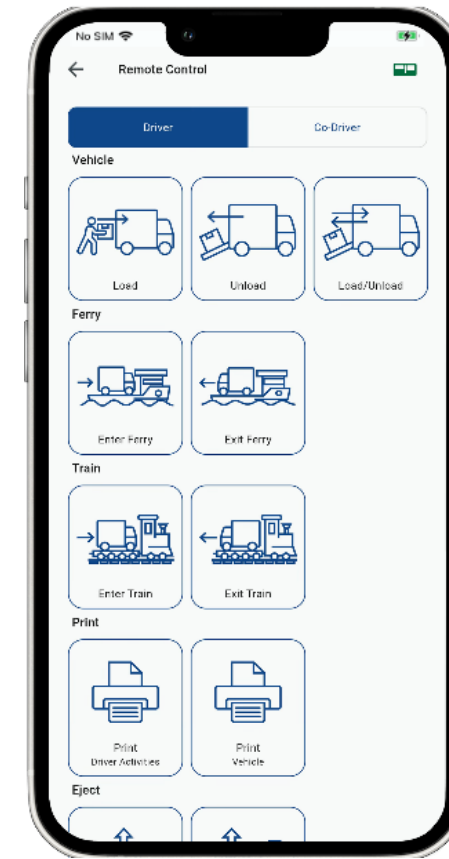

- / DTCO 4.1a and newer
- / Remote entries need to be enabled on DTCO

Enabling Remote Control:

- / Active Bluetooth connection to driver card via auto connect feature

General Information:

- / For first remote entry, token will be displayed
- / After token is inserted, session is active

Manual Entry via VDO Fleet App

Manual Entry

Description

- / All activities are written on driver card during insertion in DTCO
- / Other activities can be manually entered on DTCO to avoid gaps in driving + rest times
- / Gaps in activity documentation can lead to fines for driver and company
- / VDO Fleet App provides the opportunity to prepare and send manual entries of activities remotely
 - / Pre-Condition: Active remote session via remote control feature in app

Manual Entry

Creation and sending of manual entries via the app

Pre-Condition:

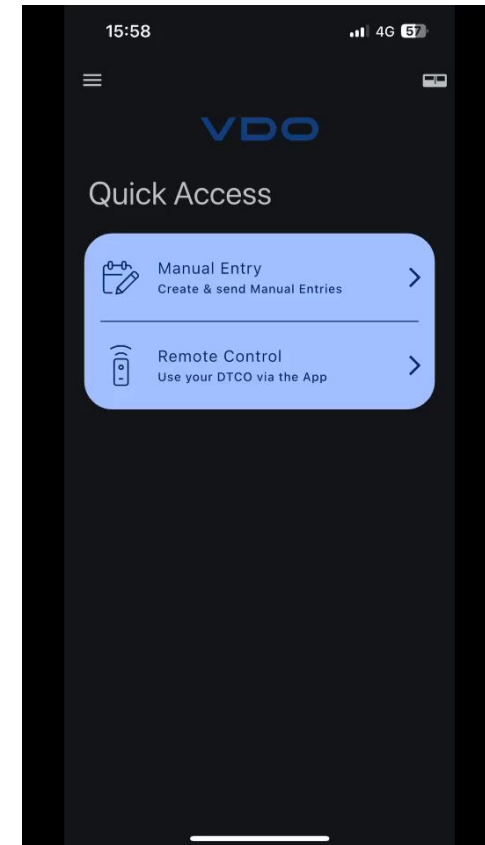

- / DTCO 4.1a and newer
- / One Remote Entry must have been send to DTCO before

Creation of manual entry:

- / Creation is independent from card status (connected/not connected)
- / Multiple activities can be created and send

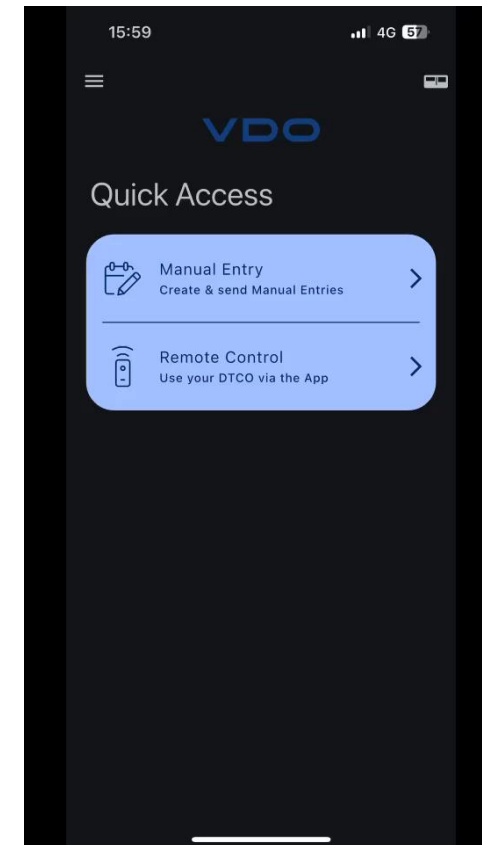

Sending of manual entry:

- / DTCO needs to be in manual entry mode (1M Entry on DTCO Display)

Manual Entry

Creation and sending of manual entries via the app
