

# Job Opportunities

Helping the world get where it needs to be.

IRU is the global industry association for road transport, driving the sustainable mobility of people and goods across the planet.

**Our rapidly evolving and dynamic organisation in Geneva is looking for a**

## Application Engineer

**JOB SUMMARY:** The Application Engineer, as a member of the TIR Applications for Customs team, will be involved in the development of new and support of existing EDI integration solutions with several National Customs Authorities or Associations to meet business need and stakeholders requirements. The incumbent will also be expected to provide technical support and guidance using his/her technical expertise and knowledge to the IT and other IRU departments and be required to ensure the BizTalk EDI platform operates effectively and efficiently as possible to meet agreed service levels.

### RESPONSIBILITIES:

The incumbent will be responsible for understanding stakeholders' requirements and implementing solutions using best practice so that they work both functionally and operationally. He/she will have to ensure that the integration designed fits the purpose and will allow operational teams to easily support solutions post go live.

- Assist with requirements gathering, design, with primary responsibility, the development and provide support during the test and release phases of EDI projects.
- Develop and maintain the BizTalk environment(s).
- Produce and update operational and maintenance processes and procedures.
- Deploy new and existing code changes including patches, upgrades and releases, whilst updating and maintaining the automated regression test suite, to ensure the BizTalk platform runs as per best practice.

### QUALIFICATIONS:

- Sound technical knowledge and experience of the following technologies: BizTalk 2009 and above, .Net framework 4.0 and above, C#, SOA Techniques and Patterns, WCF, XML, XSD, XSLT, SQL server 2008 and above (defining database tables and stored procedures),
- Strong experience in dealing with technical problems and communicating with customers and stakeholders,
- Open-minded and willing to learn and use new languages and technologies
- Front-end skills (JavaScript, HTML5, CSS) or/and Java JEE skills would be an asset.
- Familiar with Agile development (KANBAN/SCRUM), Build Automation tools (MSBUILD, MAVEN) and Source control (GIT).
- English and French is a must.
